SAFETY SHOES

**MADE TO  
RESIST**

**EXTREMELY ROBUST &  
DURABLY LIGHTWEIT**

THE NEW ATLAS<sup>®</sup> XT SERIES WITH  
INNOVATIVE EXTRAGUARD<sup>®</sup>  
UPPER TECHNOLOGY

Extreme robustness and durable lightweightness  
are combined for the first time: GORE-TEX safety  
shoes with EXTRAGUARD<sup>®</sup> upper technology set  
new standards for robust yet lightweight safety shoes.

PRODUCTS

# EXTRAGUARD®

## LIGHTWEIGHT FOR HARD WORK THE NEW HIGH-TECH UPPER

- + In EXTRAGUARD®, GORE-TEX has developed upper technology that combines the advantages of an extremely robust upper with those of lightweight, breathable textiles, thus enabling the production of a completely new class of GORE-TEX safety shoes for the first time.
- + The abrasion-resistant upper construction is 40% lighter than leather and made for the harshest work environments.
- + Even after months of continuous stress and in demanding wet conditions, EXTRAGUARD® absorbs hardly any moisture from the outside.
- + GORE-TEX safety shoes with EXTRAGUARD® upper construction are extremely robust. The shoe provides reliable and safe protection against mechanical loads, everyday chemicals, heat and moisture. It does not change shape or colour and retains its properties over the entire life of the product.

# BENEFITS OF EXTRAGUARD®

A shoe that is lightweight – and stays that way even in the rain

## XR-LAUFSOHLENSYSTEM

20% of the outsole of the XT models consists of added solids. In the sole production of a single shoe, we can therefore save one fifth of primary materials and thus reduce the use of raw materials.

## XT-RECYCLING INSOLE

The insole is made of 86% recycled ecofoam. The result is top-level comfort for your feet and sustainability for our planet. The sole is particularly breathable, quick-drying and guarantees optimal impact cushioning.

## EXTREMELY ROBUST

The EXTRAGUARD® upper technology is designed for the harshest work environments and provides robust protection even after months of use or constant wear and tear in demanding wet conditions.

## LIGHTWEIGHT

When dry, the robust and abrasion-resistant upper construction is 40% lighter than leather.

## DURABLY LOW WATER ABSORPTION

The upper barely absorbs moisture from the outside even after prolonged use or loss of the water-repellent impregnation

## QUICK RE-DRYING

The upper allows significantly faster drying time compared to safety shoes with conventional uppers.

## REDUCED HEAT LOSS WHEN WET

Moisture from the outside can only penetrate to the innovative inner construction layer. This results in reduced potential heat loss and dry feet for best comfort.

## EASY CLEANING, NO MAINTENANCE REQUIRED

The EXTRAGUARD® upper is easy to clean and, unlike other conventional uppers, does not require any special care products.

EXPLORE INNOVATIONS

**XT 100 GTX**

EN ISO 20345 S3 SRC  
Art. 82800

**GORE-TEX EXTRAGUARD® Obermaterial:** extremely robust and lightweight | reduced heat loss when wet, durably low water absorption and quick re-drying | XP® metal-free penetration resistance, cushioning MPU® rebound system | abrasion-resistant MPU® toe cap | lightweight shaft construction, XR sole technology | suitable for insoles | 36 - 48

EXTREMELY ROBUST
